Fig 1 - Presthetic design as modelled and rendered in Autodesk Fusion 360. Own work. Design by Claudine Humure.

Fig 2 - Close up detail of buckle and strap. Note the buckles have been redesigned so the whole Outer socket can be printed without support material.

Avancerad Inlämning (VG)

Fritext

I appreciate this course as it is thorough and holistically pedagogical. It is helpful to see solutions to real world problems as an educational tool connected with real people doing great work. Furthermore Fusion 360 seems specifically powerful during this exercise, especially the ease of changing details in the forms and having them seamlessly compute down the timeline.

This style of learning assignment is perfect for distance education.
